

Marcos Dionel Iannibelli

Software Developer

Buenos Aires, Argentina ▪ hello@marcosdionel.com ▪ (+54) 11 6631-5085 ▪ marcosdionel.com

I am a software developer with +3 years of experience in functional requirements analysis and scalable, end-to-end solutions, aligning technical decisions with product and business objectives.

Experienced in developing comprehensive applications with a strong focus on architecture, performance, and security. Skilled in interdisciplinary collaboration and capable of driving projects from conception to delivery in dynamic environments.

AREA OF EXPERTISE

Full-Stack Development | Requirements Analysis | Software Architecture | API Design | Cloud-Based Solutions | Object-Oriented Design & SOLID Principles | Testing & Code Quality | Performance Optimization

PROFESSIONAL EXPERIENCE

Backend Developer

February 2026 - Present

Codescript

- Designed and integrated backend services using DDD and event-driven architecture (CQRS, RabbitMQ), facilitating scalable and auditable communication between microservices.
- Developed business use cases within a distributed microservices architecture, applying Clean Architecture principles and ensuring maintainable code.
- Implemented unit tests using Jest to improve code quality.
- Integrated telemetry and auditing mechanisms to enhance system observability, traceability, and incident investigation.
- Collaborated in Kubernetes-based production environments, validating deployments with ArgoCD and monitoring application health across multiple services.

Frontend Developer

Aug 2025 - February 2026

Codescript

- Designed and implemented Angular-based micro-frontends within an NX monorepo, improving scalability, modularity, and development workflows.
- Integrated frontend applications with RESTful APIs, delivering responsive, user-focused experiences.
- Collaborated with Product, Design, QA, and backend teams to translate business requirements into scalable technical solutions.
- Served as temporary Technical Lead during critical delivery phases, driving architectural decisions, coordinating development efforts, and resolving technical blockers.
- Mentored and onboarded new developers through technical guidance, code reviews, and knowledge sharing, helping accelerate team productivity and maintain engineering standards.

Software Developer

Oct 2023 - July 2025

Autonomous

- Built end-to-end websites and apps with modern technologies (React, Next.js, Astro, Node.js) ensuring performance, scalability, and responsive design across devices.
- Designed and integrated RESTful APIs and database architectures (MySQL, PostgreSQL, MongoDB) to ensure secure, reliable, and efficient data management.
- Collaborated directly with clients, translating business requirements into functional, high-quality digital products with a focus on usability and long-term maintainability.

EDUCATION

Systems Analyst

March 2024 - December 2027 (Expected)

- Escuela Da Vinci

Full Stack Web Developer

April 2022 - December 2023

- Coderhouse

SKILLS

Programming Languages: JavaScript | TypeScript | Java | Python

Frontend Technologies: React | Angular | Next.js | Astro

Backend Technologies: Node.js | Nest.js | Docker | Jest | RabbitMQ

Databases: PostgreSQL | MongoDB | MySQL | SQLite

Cloud Services: AWS | Microsoft Azure | Azure DevOps | ArgoCD | Kubernetes

Version Control: Git

Automation: n8n

AI: Claude | Cursor

LANGUAGES

English

- Intermediate - B2

Spanish

- Native
